Fernando Hoces de la Guardia

Summary

Policy researcher and applied economist who has led teams through complex data analyses that inform major policy decisions, from national policy at government agencies in Chile to multi-year research programs at UC Berkeley. Designed and implemented a randomized experiment inside a complex data project with many moving pieces: multi-source data ingestion, record linkage across registries and journals, hypothesis-encoding protocols, and a team of research assistants. Carried out quasi-experimental impact evaluations (difference-in-differences, regression discontinuity, instrumental variables) on large administrative datasets. A career in research transparency and reproducibility highlights a dedication to rigorous, clearly interpretable data outputs that translate into actionable recommendations.

Technical Skills

Programming R (expert), Stata, $\LaTeX$, Python, SQL

Data & AI tooling Git / GitHub, RMarkdown / Quarto, Jupyter, reproducible data pipelines, record linkage across large administrative datasets, LLM-assisted automation (agentic coding tools, e.g. Claude Code)

Methods Causal inference, experiments, difference-in-differences, regression discontinuity, instrumental variables, survey design, cost-benefit analysis, microsimulation

Languages Spanish (native), English (fluent)

Selected Technical Projects

Data pipeline Built and maintained a data pipeline over 5,000+ pre-registered hypotheses pulled from multiple study registries: automated ingestion, record linkage across registries and journals, and reproducible analysis datasets. [Working paper](#).

Reproduction platform Co-designed and oversaw the Social Science Reproduction Platform, which hosted 300+ reproductions (200+ papers, 500+ claims). [ACRE guide](#) [\[archive\]](#)

Shiny apps for policy analysis Built interactive Shiny apps letting readers test how a policy estimate changes under different modeling assumptions, applied to [mass deworming](#), [progressive wealth taxation](#), and [minimum wage](#) policy estimates (underlined links open the live apps).

Experience

- 2019–2026 **Assistant Project Scientist**, UNIVERSITY OF CALIFORNIA, BERKELEY
- **Co-PI, Publication Bias and Standardization of Results research program:** secured \$880K (FAIR/NHH) to measure and explain under-reporting of results in economics. Designed and ran a randomized experiment with a sample of over 300 teams of academic researchers; built a hypothesis-encoding protocol and led a team of 3 research assistants.
 - **Open Policy Analysis Initiative (BITSS):** led program embedding open-science methods into government policy analysis. Presented the framework and delivered tailored recommendations to agencies including CBO, IADB, USAID, and Chile's Ministry of Finance. Framework published in *Science and Public Policy*. bitss.org/opa/
 - **Interactive policy-analysis apps:** built Shiny apps letting users test how policy estimates change under alternative assumptions (mass deworming, wealth taxation, minimum wage).
 - **Social Science Reproduction Platform:** co-designed and oversaw a platform that hosted 300+ reproductions by researchers worldwide (200+ papers, 500+ claims).
- 2017–2018 **Postdoctoral Research Fellow**, UC BERKELEY (BITSS)
- Designed and delivered training curriculum (Git/GitHub, pre-registration, dynamic documents, reproducibility) for hundreds of researchers across multiple countries.
 - Co-authored an IDB report on reproducible research, adopted as staff guidance.
- 2011–2012 **Junior Economic Advisor**, MINISTRY OF FINANCE, CHILE
- Produced time-sensitive analyses on labor, social, and education policy for the Minister's office; quantified budget impact of policies informing multi-billion-dollar allocations.
- 2010–2011 **Research Associate**, UNIVERSIDAD DE CHILE, DEPARTMENT OF ECONOMICS
- Evaluated a national financial aid program using Regression Discontinuity on administrative records; found small effects on enrollment and graduation, informing follow-up programs.
- 2006–2008 **Economist**, MINISTRY OF PLANNING, CHILE
- Co-led impact evaluation of *Chile Solidario*, the national anti-poverty program, using Difference-in-Differences and matching on administrative + survey data.
 - Produced official poverty and inequality estimates (pre- and post-transfer).

Education

- 2017 **PhD, Public Policy Analysis**, Pardee RAND Graduate School, Santa Monica, CA
- 2010 **M.A., Economics**, University of Pennsylvania, Philadelphia, PA
- 2006 **B.A. & M.A., Economics**, Universidad de Chile, Santiago, Chile

Selected Publications

- 2026 *Hoces de la Guardia, F.*, Miguel, E., et al. "Beyond Publication Bias: Characterizing and Understanding Missing Results in Economics." [Latest draft](#).
- 2026 Brodeur, A., . . . , *Hoces de la Guardia, F.*, et al. "Reproducibility and robustness of economics and political science research." *Nature* 652, 151–156.
- 2021 *Hoces de la Guardia, F.*, Grant, S., Miguel, E. "A Framework for Open Policy Analysis." *Science and Public Policy*. Full list on [personal site](#).

Teaching

- 2019–2022 UC Berkeley: [Introduction to Econometrics](#); Environmental Economics & Policy
- 2007–2010 Econometrics I, Universidad de Chile (3 terms)
