

## Summary

Policy researcher and applied economist applying causal inference, experimentation, and large-scale data analysis to high-stakes decisions, from national policy at key government agencies in Chile to multi-year research programs at UC Berkeley. Designed and ran an \$880K FAIR/NHH-funded randomized controlled trial (RCT) to understand missing results in economics; led the Open Policy Analysis Initiative at BITSS, developing a framework for transparent policy analysis published in *Science & Public Policy*. Expertise using administrative and survey data for quasi-experimental impact evaluations (DD, RDD, IV) and policy analysis (microsimulations, cost-benefit analysis), with an emphasis on transparency and reproducibility. Proven track record building and leading teams, securing \$2M+ in competitive funding (FAIR/NHH, NIH, Templeton, Arnold Ventures, Coefficient Giving), and translating rigorous evidence into actionable recommendations for agencies including CBO, IADB, and USAID. Actively testing LLM-based tools to scale hypothesis encoding and exploring AI agents for reproducible research pipelines.

## Job Market Paper

*"Beyond Publication Bias: Characterizing and Understanding Missing Results in Economics"* (with Miguel, E., Pathan, G., Rocha, V., Shaji, A., Sørensen, E., Tungodden, B.). [Latest version here](#).

## Work Experience

2019–2026 **Assistant Project Scientist**, University of California, Berkeley

- **Co-PI, Publication Bias and Standardization of Results research program (2023–2026)**: secured \$880K (FAIR/NHH) to measure and explain under-reporting of results in economics. Designed and ran a randomized experiment with a sample of over 300 teams of academic researchers; built a hypothesis-encoding protocol and led a team of 3 research assistants. [Working paper](#).
- **Open Policy Analysis Initiative, BITSS (2019–2022)**: led program embedding open-science methods into government policy analysis. Presented the framework and delivered tailored recommendations to agencies including CBO, IADB, USAID, and Chile's Ministry of Finance. Framework published in *Science & Public Policy*. [bitss.org/opa/](https://bitss.org/opa/)
- **Social Science Reproduction Platform**: co-designed and oversaw development of a platform for crowdsourcing computational reproducibility, which hosted 300+ reproductions by researchers worldwide (200+ papers, 500+ claims). [ACRE guide \[archive\]](#)

2017–2018 **Postdoctoral Research Fellow**, University of California, Berkeley (BITSS)

- Designed and delivered training curriculum (Git/GitHub, pre-registration, dynamic documents, reproducibility, Mertonian norms) for hundreds of researchers across multiple countries, in collaboration with Prof. Edward Miguel.
- Co-authored an IDB report on reproducible research, adopted as staff guidance.

2011–2012 **Junior Economic Advisor**, Ministry of Finance, Chile

- Produced time-sensitive analyses on labor, social, and education policy for the Minister's office; quantified budget impact of policies informing multi-billion-dollar allocations.

- 2010–2011 **Research Associate**, Universidad de Chile, Department of Economics  
 ○ Evaluated a national financial aid program using Regression Discontinuity on administrative records; found small effects on enrollment and graduation, informing follow-up programs.
- 2006–2008 **Economist**, Ministry of Planning, Chile  
 ○ Co-led impact evaluation of *Chile Solidario*, the national anti-poverty program, using Difference-in-Differences and matching on administrative + survey data.  
 ○ Produced official poverty and inequality estimates (pre- and post-transfer).

## Education

- 2017 **PhD in Public Policy Analysis**, *Pardee RAND Graduate School*  
 2010 **M.A. in Economics**, *University of Pennsylvania*  
 2006 **B.A. & M.A. in Economics**, *Universidad de Chile*

## Teaching Experience and Mentoring

### Instructor in Semester-long Courses (textbooks in parentheses)

- 2022 *Introduction to Econometrics (EC140)* (Angrist & Pischke 2015), University of California, Berkeley. [Materials here](#).
- 2019–2020 *Introduction to Environmental Economics & Policy (EEP1)* (Mankiw-Micro, Banerjee & Duflo 2019, Kwak 2017), University of California, Berkeley.
- 2007–2010 *Econometrics I* (Stock & Watson), Universidad de Chile (2007, 2008, 2010).

### Mentoring

- 2019–2026 Supervised 8 research assistants (at least 50% time for one semester or more)
- 2019–2026 Supported job and graduate school searches (placements in parentheses): Viviane Rocha (FAIR/NHH), Emma Ng (California Public Utilities Commission), Keanu Lin (States United Democracy Center), Max Zhang (Berkeley Initiative for Young Americans), Aleksandra Ma (Deloitte), and Polly Pu (Master's at CMU)
- 2018–2022 Supervised 27 Berkeley students through the Undergraduate Research Assistance Program (25% of student's time), over 3 years.

---

## Service and Outreach

- Refereeing *Harvard Data Science Review*; *Contemporary Economic Policy*.
- 2017–2026 *Research transparency trainings and guest lectures*, mostly with BITSS ([33](#)).
- Op-eds “How the Administration's Open Government Plan Can Be More Transparent”, *The Hill*, 2023 (with E. Miguel); “Aprobando la transparencia y rechazando la polarización”, *La Tercera*, 2022 (with A. Hojman and E. Miguel); “Credibilidad y transparencia en políticas públicas”, *La Tercera*, 2021 (with E. Miguel).

---

## Additional Information

- Webpage <https://fhoces.github.io/>
- Software: R, Stata, L<sup>A</sup>T<sub>E</sub>X, Python, SQL. GitHub profile: [github.com/fhoc](https://github.com/fhoc)
- Languages: Spanish and English.
- Nationality: U.S. and Chilean
